A BIT MORE ABOUT THE CONTENT OF THE EVENT

We will use THE MOVING THEATRE as a case-study that impacted positive change by helping shift the current negative narrative surrounding different migrant communities.

We will specifically look at how a project that emerged from a series of workshops within a small organisation transformed into a publication, influential exhibitions and a multi-award winning documentary that travelled the world, helping shape an authentic narrative around the migrant experience.

You will meet the project directors who will share their insights from the project to explore how and why creative collaboration affects positive change.
